

SHOUT NANO

Your own portable emergency exit.

GLOBAL SATELLITE DURESS

- Two-way communications
- Pocket-size, self contained satellite tracker
- True Global coverage
- Dedicated duress alarm button
- Ultra low power consumption
- Real-time reporting

SkyNet announce the SHOUT NANO Your Own Portable Emergency Exit

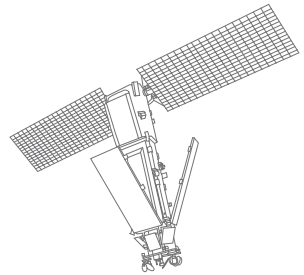

SHOUT NANO is a handheld, global, 2 way satellite communication device and GPS emergency beacon. Essential for emergency alerting and rescue, location based reporting or text messaging, from even the most remote jungle or desert locations.

The SHOUT NANO is equipped with an LCD display and on-screen keyboard allowing 2 way transmission of free hand text or pre-defined messages.

Emergency alerts can be triggered from a dedicated alarm button. The SHOUT NANO also incorporates a "check-in" function as well as an internal motion sensor to allow the detection of a man down situation. Capability to be integrated with a 24 / 7 security monitoring service for emergency escalation and response anywhere, anytime.

SHOUT NANO

Your own portable emergency exit.

- Supports Short Burst Data (SBD)
- 50-channel GPS receiver
- Motion sensor
- Audio alert
- Battery operated (2.2A-Hr)
- USB interface (used to charge battery)
- Over 1200 reports
- Up to 2 months battery life per recharge

SkyNet's mobile duress solutions interface with a range of duress alarm monitoring options ranging from self monitoring to utilising a Grade A1 Security Monitoring Centre with defined escalation protocols :

Self Monitoring SkyNet's Fleet Information System (FIS) web interface features :

- Audible alarm
- On screen flash alert
- Multiple map views
- Location information Latitude / Longitude and address fields
- Movement updates onscreen

An alarm is triggered from a users device and activates an alarm on an administrators computer.

This allows access to data showing the latest location, address and GPS co-ordinates as well as map views of the position. Simultaneously, SMS and e-mail notifications are transmitted with the location and user details.

Duress With End To End 24 / 7 Monitoring and Escalation Service

An all in one solution which includes an external, Grade A1 security monitoring service. When an alarm is triggered the security monitoring centre simultaneously receives that notification.

This includes all the necessary position information and the operator will escalate via defined protocols (e.g. open call to the police, contact supervisors, etc) Simultaneously SMS and e-mail notifications are transmitted with location and user details.
